

Downloading and Installing Apache Lenya 1.2.x

Table of contents

1 Download Apache Lenya 1.2.x.....	2
2 Install Apache Lenya 1.2.x.....	3

1. Download Apache Lenya 1.2.x

Current stable version of Apache Lenya is 1.2.4. This is the recommended version for production. You will at least need the Java 2 Platform, Standard Edition, version 1.4.2. Please follow the [installation instructions](http://www.apache.org/dyn/closer.cgi/lenya/1.2_x/installation/source_version.html) ([../docs/1_2_x/installation/source_version.html](http://www.apache.org/dyn/closer.cgi/lenya/1.2_x/installation/source_version.html)) .

- Lenya 1.2.4 [Windows binary](http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe)
(<http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe>) (Windows Installer) [ASC Signature](http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe.asc)
(<http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe.asc>) [MD5 Checksum](http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe.md5)
(<http://www.apache.org/dyn/closer.cgi/lenya/BINARIES/apache-lenya-1.2.4-bin.exe.md5>)

(<http://www.apache.org/dyn/closer.cgi/lenya/SOURCES/apache-lenya-1.2.4-src.tar.gz.asc>) [MD5 Checksum](http://www.apache.org/dyn/closer.cgi/lenya/SOURCES/apache-lenya-1.2.4-src.tar.gz.md5)
(<http://www.apache.org/dyn/closer.cgi/lenya/SOURCES/apache-lenya-1.2.4-src.tar.gz.md5>)

While the available Windows installer is great to set up Apache Lenya quickly on Windows, some tasks such as [deploying your own publication](http://www.apache.org/dyn/closer.cgi/lenya/1.2_x/how-to/deploy_publication.html) ([../docs/1_2_x/how-to/deploy_publication.html](http://www.apache.org/dyn/closer.cgi/lenya/1.2_x/how-to/deploy_publication.html)) require you to use the source version at this time. All binary distributions come with a signed MD5 checksum to verify the file integrity. You may want to download a [MD5 check program for windows](http://www.pc-tools.net/win32/md5sums/) (<http://www.pc-tools.net/win32/md5sums/>) (this program has been recommended by the author of PuTTY). The Apache Software Foundation has [more information on ASC Signatures and MD5 checksums](http://people.apache.org/~henkp/cgi-bin/md5.cgi) (<http://people.apache.org/~henkp/cgi-bin/md5.cgi>) .

Download with Subversion

We use [Subversion](http://subversion.tigris.org/) (<http://subversion.tigris.org/>) (SVN for short) as our version control system. The

following instructions explain [how to get Apache Lenya via Subversion](#) (subversion.html) . This is useful to get bug fixes for the stable 1.2-series, which is in maintenance mode, before they make it into the next release of that series.

Download nightly snapshots

These are automated [nightly snapshots](http://svn.apache.org/snapshots/lenya/) (http://svn.apache.org/snapshots/lenya/) (tar.gz archives) of the SVN repository.

2. Install Apache Lenya 1.2.x

Please follow our [installation instructions](#) (source_version.html) for the source version. Instructions on how to install the binary version are contained in the distribution packages.
