3 .....	2

## 1. Introduction

Recommended resources

- [JUnit homepage](http://www.junit.org) (<http://www.junit.org>)
- [JUnit Cookbook](http://junit.sourceforge.net/doc/cookbook/cookbook.htm) (<http://junit.sourceforge.net/doc/cookbook/cookbook.htm>) (Eric Gamma, Kent Beck)
- [JUnit: A Cook's Tour](http://junit.sourceforge.net/doc/cookstour/cookstour.htm) (<http://junit.sourceforge.net/doc/cookstour/cookstour.htm>) (Eric Gamma, Kent Beck)
- [JUnitTest Infected: Programmers Love Writing Tests](http://junit.sourceforge.net/doc/testinfected/testing.htm) (<http://junit.sourceforge.net/doc/testinfected/testing.htm>)

## 2. Organization

1. Put your test classes in `src/test`.
2. Add the ant task that executes your test to `src/targets/test-build.xml`

3.
