

The languageselector Module

Table of contents

1 Introduction.....	2
2 Adding Custom Flags.....	2

1. Introduction

The languageselector module provides an XHTML widget to switch languages on a website.

2. Adding Custom Flags

More flags can be obtained from [Wikipedia](http://en.wikipedia.org/wiki/Gallery_of_sovereign_state_flags)
(http://en.wikipedia.org/wiki/Gallery_of_sovereign_state_flags) .

Be sure to rename them according to `<two-letter-language-code>.svg`.
