## 2. Version 2007-10 ()

### 2.1. 1.2

- [1.2] Modified lenya.sh to allow multiple instances of Lenya and add stop command. Stops this instance before start attempts. Reduced dependence on environment variables: LENYA\_HOME is set to current directory, and JETTY\_PORT is set here. [Diff](#) (<http://svn.apache.org/viewcvs.cgi?rev=589735&view=rev>) Committed by solprovider.

### 2.2. 1.4

- [1.4] fixes [http://issues.apache.org/bugzilla/show\\_bug.cgi?id=43581](http://issues.apache.org/bugzilla/show_bug.cgi?id=43581) (custom datasources in cocoon.xconf were being nuked by an unspecific lenya patchfile) the approach is now to add to the <datasources/> element instead of overwriting it, which mandates another patchfile that will make sure an empty <datasources/> element is created first. thanks to markus angst for this patch. please test, i don't use custom datasources... [Diff](#) (<http://svn.apache.org/viewcvs.cgi?rev=584272&view=rev>) Committed by nettings.

- [1.4] added a configuration file for jetty6 (needs to be downloaded separately), in order to ease testing with proxied environments. see comment header of this file for usage details. our included jetty should eventually be updated, since it has a bug that prevents ajp proxy connections from working - this is kind of testing the waters... [Diff](#) (<http://svn.apache.org/viewcvs.cgi?rev=590068&view=rev>) Committed by nettings.
- [1.4] added proxy test environment. no functional changes, everything is inactive by default. needs docs (see header of jetty6.xml for a rough outline), and proxy settings are somewhat broken atm... [Diff](#) (<http://svn.apache.org/viewcvs.cgi?rev=590121&view=rev>) Committed by nettings.
