

Accreditable Managers

by Andreas Hartmann

1. Introduction

An `AccreditableManager` combines a `UserManager`, a `GroupManager`, an `IPRangeManager` and a `RoleManager`.

2. UserManager

A `UserManager` manages users.

3. GroupManager

A `GroupManager` manages groups.

4. IPRangeManager

A `IPRangeManager` manages IP address rangess.

5. RoleManager

A `RoleManager` manages roles.
