1. Introduction and explanation of symbols

Changes are sorted by "{0}" and thentype chronologically with the most recent at the top. These symbols denote the various action types: =add, =remove, =update

2. Version 2007-07 ()

2.1. 1.2

- [1.2] fixes http://issues.apache.org/bugzilla/show_bug.cgi?id=42825 [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=553896&view=rev>) Committed by jann.

2.2. 2.0

- [2.0] brown paper bag commit - forgot josias' additional xsl... [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=555625&view=rev>) Committed by nettings.
- [2.0] Added search test case (required to declare the LuceneCocoonSearcher role) [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=555702&view=rev>) Committed by andreas.
- [2.0] started work on generic insertLink usecase. this will make the step-matched individual insertLink.jx's of editors obsolete. still missing: javascript, i18n, error handling. (this is a dummy usecase with no server-side effects) [Diff](#) (<http://svn.apache.org/viewcvs.cgi?rev=555811&view=rev>) Committed by nettings.
- [2.0] introduce a session role into the default publication. everybody (aka <world/>) gets the session role in authoring/. it allows access to ac.login (not really, since it is sneaked past the authorizer), ac.logout and admin.aboutLenya. all these should be available to everyone, always. evil-minded people can still remove them via the admin gui, but they get what they deserve. [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=556049&view=rev>) Committed by nettings.
- [2.0] Added i18n messages for usecase module [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=556886&view=rev>) Committed by andreas.
- [2.0] Added i18n resources for homepage module [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=557599&view=rev>) Committed by andreas.
- [2.0] Prevents backspace in browsers from making the browser to go back a page. [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=558075&view=rev>) Committed by rfrovarp.
- [2.0] introduced generic editors.insertLink usecase implementation. the view is created by a cocoon pipeline, not a jxtemplate, because the necessary data is more readily available as input modules than via the java api. the next commit will migrate tinymce to use this implementation. [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=558544&view=rev>) Committed by nettings.
- [2.0] tinymce now uses the generic editors.insertLink usecase. [Diff](#)
(<http://svn.apache.org/viewcvs.cgi?rev=558545&view=rev>) Committed by nettings.

- [2.0] simplified tinymce localisation code (folded into page2edit.xsl transform, gets rid of extra javascript transform). [Diff](http://svn.apache.org/viewcvcs.cgi?rev=559065&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=559065&view=rev) Committed by nettings.
- [2.0] renamed usecase-edit.xconf to usecase-publicationEdit.xconf for consistency. no functional changes. [Diff](http://svn.apache.org/viewcvcs.cgi?rev=559123&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=559123&view=rev) Committed by nettings.
- [2.0] forgot to svn add those... [Diff](http://svn.apache.org/viewcvcs.cgi?rev=559656&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=559656&view=rev) Committed by nettings.
- [2.0] added editors.createResource usecase (re-uses the code of resource.Create, but menu turned off). turned off continuations for insertFoo usecases, as they have just one step and no server-side effects. [Diff](http://svn.apache.org/viewcvcs.cgi?rev=559824&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=559824&view=rev) Committed by nettings.
- [2.0] migrate fckeditor to new editor usecase api. this is a little shaky atm... [Diff](http://svn.apache.org/viewcvcs.cgi?rev=560257&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=560257&view=rev) Committed by nettings.
- [2.0] Moving media metadata config from core to resource module [Diff](http://svn.apache.org/viewcvcs.cgi?rev=554629&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=554629&view=rev) Committed by andreas.
- [2.0] removed unused asset.xsl [Diff](http://svn.apache.org/viewcvcs.cgi?rev=556067&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=556067&view=rev) Committed by nettings.
- [2.0] removed another, totally unrelated, but equally unused asset.xsl from the core. [Diff](http://svn.apache.org/viewcvcs.cgi?rev=556068&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=556068&view=rev) Committed by nettings.
- [2.0] Removed obsolete defaultusecases module (prevents Javadocs from being generated) [Diff](http://svn.apache.org/viewcvcs.cgi?rev=557237&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=557237&view=rev) Committed by andreas.
- [2.0] Removed obsolete SourceWritingTransformer XSLTs [Diff](http://svn.apache.org/viewcvcs.cgi?rev=557621&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=557621&view=rev) Committed by andreas.
- [2.0] added tinymce localisation according to {request:locale}. quite awkward, since it requires an extra pipeline and transformation, but there is no way to determine the browser language settings via javascript :(removed "lenya.editorModule" parameter, callbacks are now provided by the parent window and accessed via window.opener, i.e. the generic usecase no longer needs to know which module is calling. this is work in progress. [Diff](http://svn.apache.org/viewcvcs.cgi?rev=558896&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=558896&view=rev) Committed by nettings.
- [2.0] delete stale usecase-edit.xconf [Diff](http://svn.apache.org/viewcvcs.cgi?rev=559140&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=559140&view=rev) Committed by nettings.

- [2.0] new generic usecase API for editors. see modules/editors/resources/javascript/org.apache.lenya.editors.js for documentation. adds generic insertLink and insertAsset/Image usecases with infrastructure. enhanced oneform editor, it uses external usecases now. this will break external usecase support in all editors. [Diff](http://svn.apache.org/viewcvcs.cgi?rev=560251&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=560251&view=rev) Committed by nettings.

- [2.0] fixes bug http://issues.apache.org/bugzilla/show_bug.cgi?id=42846 for bxes. this is just an example fix to show where the problem lies. the correct solution for all editors is to factor the stuff out into a separate usecase. removes all occurrences of \$contextprefix from sitemap and xslt, since this concept is now obsolete thanks to the proxy transformer.
