- [1.4] merged new publication configuration from branch trunk-rework-pubconf. works for me, please test. HEADSUP: THIS COMMIT WILL BREAK YOUR EXISTING PUBLICATIONS. you will need to tweak your publication.xconf file. for details, just build the trunk and read the introductory page you see after starting lenya. take a look at src/pubs/default/config/publication.xconf for what's changed. TODO: * fix NPE during build if src/pubs/[default|blog]/publication.xml is deleted entirely (as a workaround, it's now a null-byte file). * get rid of multiple-inheritance templating code (which does not work). currently, that stuff has only been removed from the user-visible configuration. under the hood, it still looks as if we supported it. some weird empty-array semantics and a world of null objects pain... [Diff](#)
