

# Proxying Apache Lenya

## 0.1 Documentation

by Michael Wechner

## 1. Proxying Apache Lenya

In order to run a Lenya site dynamically, add the following to your Apache httpd.conf file after making sure that you have the mod\_proxy module installed:

```
<VirtualHost 192.168.1.13>
  ServerName 192.168.1.13
  ServerAdmin lenya@cocoon.apache.org
  DocumentRoot /home/lenya/build/apache_1.3.24/htdocs
  ProxyPass      / http://192.168.1.13:8080/lenya/blog/live/
  ProxyPassReverse / http://192.168.1.13:8080/lenya/blog/live/
  ErrorLog logs/blog-error_log
  CustomLog logs/blog-access_log common
</VirtualHost>
```
