- [No context matched] * remove contents of pubs/*/publication.xml (empty files remain) * remove rendering support for publication.xml (global-sitemap.xmap). * remove all uses of <http://apache.org/cocoon/lenya/publication/1.0> namespace. * introduce a new new namespace: <http://apache.org/cocoon/lenya/publication/1.1>. * publication.xconf data must now be in that namespace (backwards-incompatible, requires changes to old files) notably, module, proxy and resource-type are now grouped in wrapper elements. * move information from pubs/*publication.xml to pubs/*config/publication.xconf * add

webapp/lenya/resources/schemas/publication.rng to define the namespace * add complete list of element/attribute constants to PublicationConfiguration.java (although only a subset is actually parsed there) and enable namespace support. * modify webapp/lenya/resources/i18n/modules2xinclude.xsl accordingly * introduce core and per-publication readme.xml. * improve introduction pages TODO: * fix webapp/lenya/xslt/modules/modules2xinclude.xsl, rename to something more intuitive * fix Instantiator.java [Diff](http://svn.apache.org/viewcvcs.cgi?rev=511575&view=rev) (http://svn.apache.org/viewcvcs.cgi?rev=511575&view=rev) Committed by nettings.
