

# The Apache Lenya Community

## Table of contents

1	Contribute to the Wiki.....	2
2	Contribute code.....	2
2.1	Preparing a Patch.....	2
2.2	Apply open patches.....	2

Here you will find information on how to interact with and become a member of the Apache Lenya community. Please read [Contributing to Apache Forrest](http://forrest.apache.org/contrib.html) (<http://forrest.apache.org/contrib.html>) as well because it contains some more information about the process.

## 1. Contribute to the Wiki

The [Lenya Wiki](http://wiki.apache.org/lenya/) (<http://wiki.apache.org/lenya/>) is the scratchpad for the Lenya documentation as well as a whiteboard that is used by the community to sketch out proposals about the further direction of the project.

## 2. Contribute code

### Note:

Please use our [Bug tracker](#) ([http://issues.apache.org/bugzilla/enter\\_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core&rep\\_platform=Other&op\\_sys=other&priority=Critical](http://issues.apache.org/bugzilla/enter_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core&rep_platform=Other&op_sys=other&priority=Critical)) to submit patches instead of sending them to the mailing list. All our committers started in creating an account there ;-)

You can contribute code as patch via our [Bug tracker](#) ([http://issues.apache.org/bugzilla/enter\\_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core](http://issues.apache.org/bugzilla/enter_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core)). For this, you file a bug entry in Bugzilla, using the links provided below. The bug entries in Bugzilla should provide a description of what the patch does, and how to apply it. Any further discussion should occur on the Lenya Developer list (see [mailing lists](#) ([../community/lenya-dev.html](http://community.apache.org/lenya/communities/lenya-dev.html)))

### 2.1. Preparing a Patch

- For general procedures please see the Cocoon documentation [How to Prepare a Patch](#) (<http://cocoon.apache.org/2.1/howto/howto-patch.html>) and [How to Contribute a Patch via Bugzilla](#) (<http://cocoon.apache.org/2.1/howto/bugzilla.html>). Note that the actual command to create the patch is `svn diff` (instead of `cvs diff -u` as suggested in said documents).
- Make sure you follow the [coding guidelines](#) ([../docs/coding-guidelines.html](http://docs.apache.org/lenya/docs/coding-guidelines.html)).
- Test your patch by applying it to a fresh checkout of Lenya. In Eclipse for instance, this is done by choosing "apply patch" in the team perspective.
- Follow this link to enter your patch in Bugzilla: [add a new patch](#) ([http://issues.apache.org/bugzilla/enter\\_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core](http://issues.apache.org/bugzilla/enter_bug.cgi?reporter=&product=Lenya&version=Current+CVS&component=core)).

### 2.2. Apply open patches

If you as committer feel that you have some spare time, here is a list of open issues. Just go ahead fix them ;-).

- [list of all provided enhancement bugs](#) ([http://issues.apache.org/bugzilla/buglist.cgi?bug\\_status=NEW&bug\\_status=ASSIGNED&bug\\_status=REOPENED](http://issues.apache.org/bugzilla/buglist.cgi?bug_status=NEW&bug_status=ASSIGNED&bug_status=REOPENED))
- [list of all provided patches](#)

([http://issues.apache.org/bugzilla/buglist.cgi?bug\\_status=NEW&bug\\_status=ASSIGNED&bug\\_status=REOPEN](http://issues.apache.org/bugzilla/buglist.cgi?bug_status=NEW&bug_status=ASSIGNED&bug_status=REOPEN))
