The Apache Lenya Community

Table of contents

1 Contribute code
1.1 Preparing a Patch
1.2 Apply open patches

Here you will find information on how to interact with and become a member of the Apache Lenya community.

1. Contribute code

You can contribute code as e.g. an "Enhancement Patch". For this, you file a bug entry in Bugzilla, using the links provided below. The bug entries in Bugzilla should provide a description of what the patch does, and how to apply it. Any further discussion should occur on the Lenya Developer list (see mailing lists)

1.1. Preparing a Patch

- For general procedures please see the Cocoon documentation How to Prepare a Patch and How to Contribute a Patch via Bugzilla. Note that the actual command to create the patch is svn diff (instead of cvs diff -u as suggested in said documents).
- Make sure you follow the <u>coding guidelines</u>.
- Test your patch by applying it to a fresh checkout of Lenya. In Eclipse for instance, this is done by choosing "apply patch" in the team perspective.
- Follow this link to enter your patch in Bugzilla: add a new patch.

1.2. Apply open patches

If you as committer feel that you have some spare time, here is a list of open issues. Just go ahead fix them;-).

- list of all provided enhancement bugs
- <u>list of all provided patches</u>
