Apache Lenya Documentation

by Lenya community

In getting started with Lenya, one must learn not only a number of concepts, but a number of details as well. The Components section will explain the building blocks that make up Lenya, such as the sitemap, publications, and tasks.

More documentation (work in progress) can be found at the [Apache Lenya Wiki](http://wiki.apache.org/cocoon-lenya/) (http://wiki.apache.org/cocoon-lenya/) .
