3. Version 2007-11 ()

3.1. Documentation

- [Documentation] did a quick and dirty vector conversion of lenya bitmap logo. i basically opened it in gimp, scaled it tenfold, applied gaussian blur with 12 px radius and then used potrace for the conversion, -a 0.5 and -u 30 iirc. has lost considerable detail in the feather, which could be improved by selective blur. will try again later, but this shows roughly what can be done without re-drawing it.
