Lenya Subversion Guide

0.1 Documentation

by Michael Wechner

Table of contents

1. Subversion for the public

Start the shell of your choice and enter:

```
svn co http://svn.apache.org/repos/asf/incubator/lenya/trunk lenya-trunk
```

2. Subversion for committers

Start the shell of your choice and enter:

```
svn co http://svn.apache.org/repos/asf/incubator/lenya lenya
ssh -l username svn.apache.org
svnpasswd username
exit
svn sw --relocate http://svn.apache.org/repos/asf/incubator/lenya
https://svn.apache.org/repos/asf/incubator/lenya
```

3. View Subversion

http://svn.apache.org/repos/asf/incubator/lenya/trunk/

4. Subversion Tips

Installing the SVN client with SSL enabled on Debian Woody:

```
apt-get install openssl
apt-get install libssl-dev (Important Header Files)

./configure --with-ssl
make
make install (su)
svn --version
```
